PROFESSIONAL SUMMARY

Data professional with 4+ years of experience in data analytics, data quality management, and information systems, applying strong data discovery, cataloging, and classification skills to support governance, compliance, and AI readiness objectives. Proven track record profiling and inventorying large-scale data assets (500K+ records across multiple systems), building ETL pipelines with monitoring that supports data lineage visibility, and improving data quality and accuracy by ~30%. IBM Data Analyst certified and currently completing an MSc in Computer Science in Canada, with hands-on SQL, Python, and Microsoft Azure cloud data experience. Skilled at translating complex technical findings into clear governance, risk, and KPI reporting for both technical and non-technical stakeholders across cross-functional teams.

CORE COMPETENCIES

- **Data Discovery & Cataloging:** Data profiling and inventory, source-system mapping, ETL pipeline design and monitoring, metadata documentation, data lineage support
- **Data Governance & Quality:** Data classification support, data quality standards and metrics (completeness, accuracy, consistency), data stewardship collaboration, KPI tracking
- **Risk, Compliance & Resilience Analytics:** Anomaly and fraud detection modeling, data criticality and impact analysis, risk/compliance dashboarding, business availability metrics
- **Databases & Cloud Environments:** PostgreSQL, MySQL, MongoDB, SQL Server, Microsoft Azure, Docker — joins, aggregations, window functions, query optimization
- **BI, Visualization & Reporting:** Power BI, Tableau, Looker Studio, Matplotlib, Seaborn, executive and governance reporting, data storytelling
- **AI Readiness & Machine Learning:** Regression, classification, clustering, NLP, model evaluation, data bias and quality assessment for responsible AI/ML use cases
- **Tools & Methods:** Python (Pandas, NumPy, SciPy), R, Advanced Excel/VBA, Git/GitHub, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Data Analyst — APAR Nepal

Feb 2023 – Nov 2024

Kathmandu, Nepal (Hybrid)

- Conducted systematic data discovery and profiling across 500K+ records spanning multiple operational and financial systems, cataloging data structures and improving data quality and accuracy by ~30%.
- Built and maintained end-to-end ETL workflows — ingestion, transformation, and pipeline monitoring — establishing a current, reliable data layer that supports lineage tracking and impact analysis.
- Wrote complex SQL queries (joins, CTEs, window functions) to support ad-hoc data inventory requests, trend analysis, and recurring governance and KPI reporting for cross-functional teams.
- Designed interactive Power BI dashboards and automated visualizations to monitor data quality metrics and KPIs, reducing manual reporting effort by 20% and improving stakeholder visibility into data availability.
- Partnered with product, engineering, and operations stakeholders to document data processes, define reporting requirements, and translate technical findings into clear, decision-ready insights for non-technical audiences.

Data & Business Analyst — Leapfrog Technology, Inc. (Analytics Support)

Sep 2020 – Dec 2022

Kathmandu, Nepal

- Assisted in identifying and cataloging operational and customer data sources using SQL and Excel, surfacing usage trends, workflow bottlenecks, and data quality gaps.
- Built Excel and Power BI dashboards tracking data availability, system performance, and operational KPIs to support management reporting and decision-making.
- Automated recurring reporting and data consolidation workflows (Excel formulas, pivot tables, SQL scripts), reducing weekly manual reporting effort by ~25% and improving documentation consistency.
- Supported lightweight ETL and data consolidation tasks — extraction from internal systems, cleaning, deduplication, and structuring into reporting tables — improving traceability of source data.

- Collaborated with technical and non-technical stakeholders to gather requirements, define data ownership and KPIs, and present findings through clear visual summaries.

KEY DATA & ANALYTICS PROJECTS

Bank Transaction Fraud & Risk Analytics

- Performed full data discovery and EDA on a large-scale banking transaction dataset to identify high-risk segments, behavioral anomalies, and data quality issues relevant to fraud and compliance monitoring.
- Engineered Random Forest, K-Means, and Isolation Forest models for anomaly/fraud detection, benchmarking precision, recall, and F1 to recommend the most reliable approach.
- Delivered risk-focused KPI dashboards and trend summaries (Matplotlib, Seaborn) tailored for risk and compliance stakeholders.

E-Commerce Recommendation & Customer Insights — *Published, ICAIII 2026*

- Assessed data quality, completeness, and bias risk in the Amazon 2023 e-commerce dataset prior to building a hybrid recommendation system (collaborative filtering + content-based features), evaluated with Hit Rate@K, Diversity@K, and Novelty.
- Executed data cleaning, missing-value treatment, and user-item matrix construction to prepare data for responsible AI/ML use.

Nepali Sentiment Analysis — *NLP Insights*

- Cleaned and processed a bi-script (Devanagari/Romanized) Nepali text dataset, addressing data quality and consistency challenges for large-scale sentiment classification.
- Built a hybrid Transformer + CNN + BiLSTM pipeline achieving 73.88% accuracy and Macro-F1 of 0.737, surfacing customer-opinion trends.

Retinal Image Classification — Predictive Analytics — *Published, SNPD 2025*

- Designed a lightweight CNN classifying four retinal conditions with 91.14% precision; evaluated model reliability using confusion matrices and ROC/AUC to support responsible model deployment.

EDUCATION

Master of Science, Computer Science — Algoma University, Sault Ste. Marie, ON Jan 2025 – Dec 2025

Relevant Coursework: Data Analytics, Machine Learning, Database Systems, Statistical Methods

CERTIFICATIONS

- IBM Data Analyst Professional Certificate (2025)
- IBM Generative AI: Prompt Engineering
- Microsoft Azure Machine Learning Fundamentals
- Career Essentials in System Administration — Microsoft

AWARDS & RECOGNITION

- Best Engineering Award & First Runner-up — ABU Robocon
- First Place — Journey to Mustang (Robotic Association of Nepal)
- Best Innovative Award (Solar Panel Cleaning) — LOCUS
